NUTRICQ

Nutricq Ruminant blend is made with cooked grains, legumes, protein meals and fruit sourced from Central Qld. Natural non-GM products are used and there are no animal derived products involved in production.

Fruit is added to Nutricq blends to;

1. Improve flavour and colour
2. Provide high levels of natural antioxidants including beta-carotene and lycopene.
3. Fruit also helps to gelatinise grain to improve digestibility.

Cooked grain is more palatable and improves digestibility (compared to raw grain or uncooked milled grain).

A tailored vitamin and mineral premix is added.

Typical Specification

Protein	15%
Fibre	16% max
Fat	4% min
Moisture	7%
ME MJ/kg	12%

Unless otherwise stated all ingredients (excl vit and min premix) in Nutricq products are sourced from Central and North Queensland.

We believe the Nutricq product to be of the highest quality and we stand by our product integrity. If you experience any problems with the product please contact us,
